

The paper used in these products is the first 90 bright mechanical pulp based paper specifically engineered for laser printing that is both environmentally friendly and economic.

The paper uses 50% less wood fiber than 20# traditional bond. The sheet is brightened through a process that is totally chlorine free (TCF). In addition, this paper's green production process uses hydroelectricity, which reduces the amount of fossil fuel used and lowers greenhouse gases by 50%. This grade qualifies for FSC, SFI, chain of custody certification and is made carbon neutral.

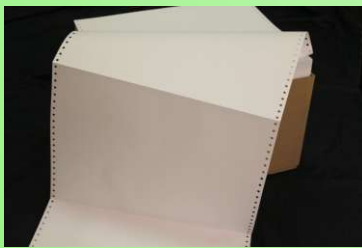

The Treeliable brand of Eco friendly paper products were designed to meet the needs of today's office environment
