

The **TREELIABLE** brand of pre-collated carbonless colored sheets are ideal for use in laser, inkjet, digital printers and copiers. The heavy weight sheets can be used by hospitals, data processing centers, insurance companies, schools and nearly any application to create multi part forms. These items can be used for multi part invoices, delivery receipts, statements and packing lists to name a few. A bright white top sheet and smooth colors give a clean appearance. Also, typed or written images remain intense, clear and legible down to the last part of the form. Shrink wrapped packages with convenient carton sizes are available for any situation from large fortune 500 companies down to a small home based business.
